

78

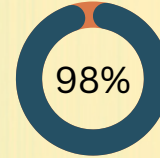

individuals
completed the
Nurse Scholar
Program

98% of participants would recommend the Nurse Scholar program to others.

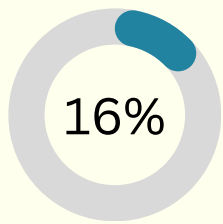

91% of participants said that after taking the program, they intended on making a change to their practice and/or personal life.

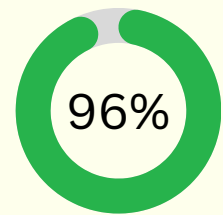

98% of participants said the program met the overall learning outcomes.

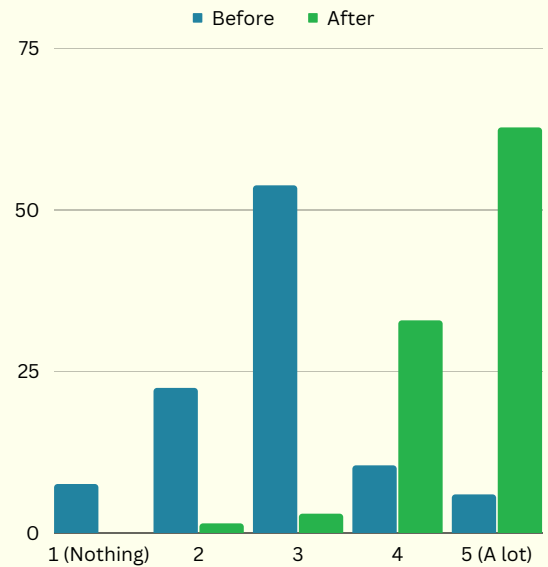

Participants were asked to rate their knowledge about agricultural health exposures **BEFORE** taking the Nurse Scholar Program on a scale from 1 (Nothing) to 5 (A lot). They were then asked the same question, but in regards to their knowledge **AFTER** taking the program.

BEFORE taking the program 6% of participants rated their knowledge as "A lot" and 10% rated their knowledge as a 4.

AFTER taking the program 63% of participants rated their knowledge as "A lot", and 33% rated their knowledge as a 4.

Participants were asked what they liked most about the program, below are some of their answers.

"I really liked the self paced nature of the course. All of the presentations were informative and useful."

"All of the information provided was vital to improve the health of those within this population."

"I liked that it was broken up into smaller sections making it very manageable to do."

"This was an absolutely amazing course, full of wealth of knowledge from all the honored professionals. Thank you again!"

"I gained a lot of knowledge that I can use to help members of my community."

"Loved the convenience of learning online at home, and the wealth of useful information and education provided by the program."
